## Summary

I am an accomplished Computer Scientist with over 20 years of leadership experience in advanced technology development. During this time, I have authored 3 books and filed over 75 patents; my work on [eyes-free interaction](#) has been profiled in mainstream publications including the [Seoul Digital Forum](#), [New York Times](#) and [Scientific American](#). I presently work on enabling user-aware interfaces after having led Accessibility for [Google Android](#) and [Google Chrome](#). I have leading edge expertise in developing auditory interfaces for mobile devices and Web applications. Earlier, I led the definition of numerous W3C standards including XForms and Aural CSS.

## Objective

Deliver technologies that enable ubiquitous, eyes-free access to the emerging Web platform from a wide variety of devices ranging from smart phones and tablets to wearables. Speech is the next dimension in user interfaces, and I am developing application frameworks that combine speech technologies with the power of the Web Cloud to deliver user-aware interfaces that enable anytime, anywhere access.

## Work experience

- Google, [Google Research](#), Mountain View, CA  
**Sr. Staff Research Scientist.** Aug 2005–Present.  
[Android Access](#) Led Accessibility from its inception to deliver many innovative end-user solutions.  
[ChromeVox](#) Designed an accessibility solution for Chrome OS built entirely of Web technologies.  
[Accessible Search](#) Built an innovative classifier for measuring Accessibility that is integrated into Google.
- IBM Research, [Almaden Research Center](#), San Jose, CA  
**Research Staff Member:** Architect, Conversational Multimodal WWW. Aug 1999–Aug 2005.  
[XForms](#) Authoring applications for the next generation WWW.  
**RDC** Reusable Dialog Components to speech-enable the Web.  
[X+V](#) Speech-enabling XHTML to create a *multimodal* Web.
- Adobe Systems, Advanced Technology Group, San Jose, CA  
**Senior Computer Scientist:** Dynamic publishing on the Internet. Oct 1995–Aug 1999.  
**PDF2HTML** Developed the PDF to HTML translator bundled with major Web search engines.  
**XML Metadata** Developed an XML-based virtual document architecture to enable content reuse.
- Digital Equipment Corporation, Cambridge Research Lab, Cambridge, MA  
**Research Staff: Retriever** –A Multimodal Web Interface. Feb 1994–Oct 1995.
- Intel Corporation, Intel Architecture Labs, Hillsboro, OR  
**Summer Associate:** Prototyped an email telephony interface. Jun–Aug 1993.
- Xerox Palo Alto Research Center, Palo Alto, CA  
**Summer Associate:** Prototyped a new reading machine architecture. May–Aug 1991.

## Education

- Cornell University, Ithaca, NY  
– **PhD. Applied Mathematics:** Aug 1989–Jan 1994.  
Awarded the [ACM Doctoral Dissertation Award, 1994](#).  
Thesis: Audio System For Technical Readings. Adviser: Prof. David Gries, Computer Science.

- MS Computer Science: May 1992.
- Indian Institute of Technology, Bombay, India: MS Computer Science: GPA: 9.78/10.00 July 1989.
- University of Pune, Pune, India: BA Mathematics: May 1987.

## Selected Awards and Honors

- Computerworld Award Smithsonian Institution [Emacspeak](#): Complete Audio Desktop. April 1999.
- Association of Computing Machinery (ACM) [Doctoral Dissertation Award](#) 1994.
- Intel Graduate Fellowship Intel Corporation, CA 1992.
- Graduate Fellowship Cornell University. 1989.
- President's Silver Medal Indian Institute of Technology, Bombay. 1989.
- Sir Cusrow Wadia Gold Medal University of Pune. 1987.
- Sir Ness Wadia Gold Medal Wadia College, Pune. 1984.

## Selected Books, patents and Articles

## Other Interests

My favorite hobby is [recreational mathematics](#). I enjoy working on puzzles, especially those that involve an intuitive feel for mathematics. One of the things I enjoyed doing the most in the early eighties was to solve the Rubik's cube faster than anyone else around me, on an average of about [thirty seconds](#)! During the last few years, discovering [Zome Systems](#) for building complex polyhedra has helped rekindle my interest in polyhedral geometry. I am also interested in linguistics and can speak about eight languages, including French, German and several Indian languages.
